

GARVEY®

KLEVER KUTTER™

A Smarter, Safer Way to Cut

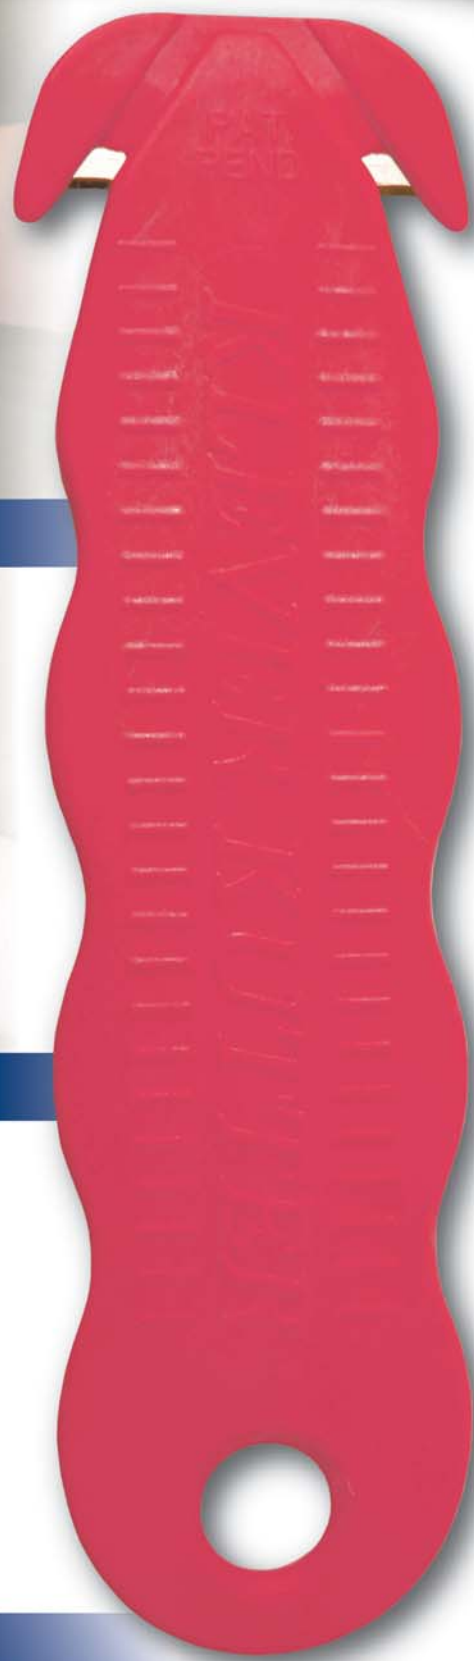

Cardboard, Plastic, Tape...

Stretch Wrap, Twine, Plastic Bands...

Box Tops, Bags and Envelopes!

SAFE

At any business, employee safety is a top priority. Klever Kutter was designed to reduce the risks posed by traditional box cutters.

- *PROTECTIVE* - Klever Kutter's recessed blade helps prevent accidental contact, reducing the possibility of personal injury, lost productivity and potential lawsuits.
- *DISPOSABLE* - After its useful life, Klever Kutter can be conveniently discarded or recycled, eliminating the need to handle or replace used blades.
- *SHIELDED* - With its shielded cutting area, Klever Kutter reduces the risk of damaging merchandise while cutting packaging.

VERSATILE

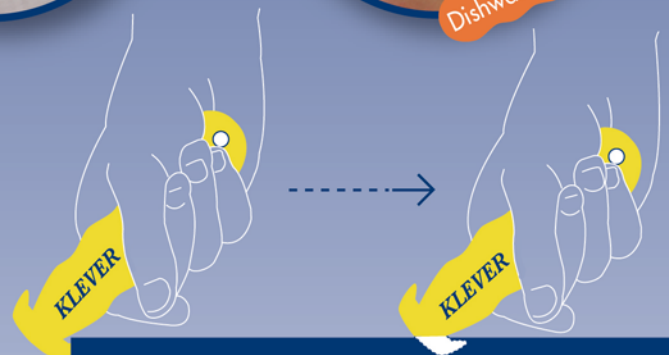

Klever Kutter meets the needs of a variety of applications. It features twin blade surfaces for twice as many cuts.

EASY

With Klever Kutter, opening boxes and packaging is simple.

1 Angled hook punctures the material.

2 Blade quickly cuts through packaging.
